

During the remodeling and construction of the Facility Base the residents and Aura employees will be affected by an increase in traffic flow, both light vehicles as well as heavy vehicles. For this reason we have some recommendations for you.

UNDER CONSTRUCTION!

When you are the pedestrian

STOP, LOOK, LISTEN WHEN CROSSING.
When you need to cross the street, do so only at intersections and pedestrian crossings and after checking that there is not an oncoming vehicle. Never cross diagonally.

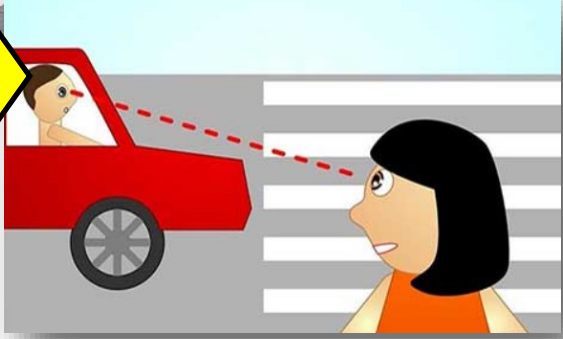

Always walk on the sidewalks when provided, as this is the safest place for pedestrian traffic

Do not run in crosswalks, make sure the driver of the vehicle sees you and the vehicle is stopped in order for you to cross the street safely.

Do not allow children to play in the street, use established playgrounds.

If you go biking always remember transit the right lane, respects the signals installed inside the recinto and before making a turn sure that there is not oncoming vehicles

If you're walking your dog, make sure that the dog is wearing his dog collar, if for some reason your dog escapes and crosses the street, do not follow the dog, you could be run over by a vehicle

When you are the driver

Slow down at intersections and crosswalks, make sure no pedestrians or cyclists come across the street.

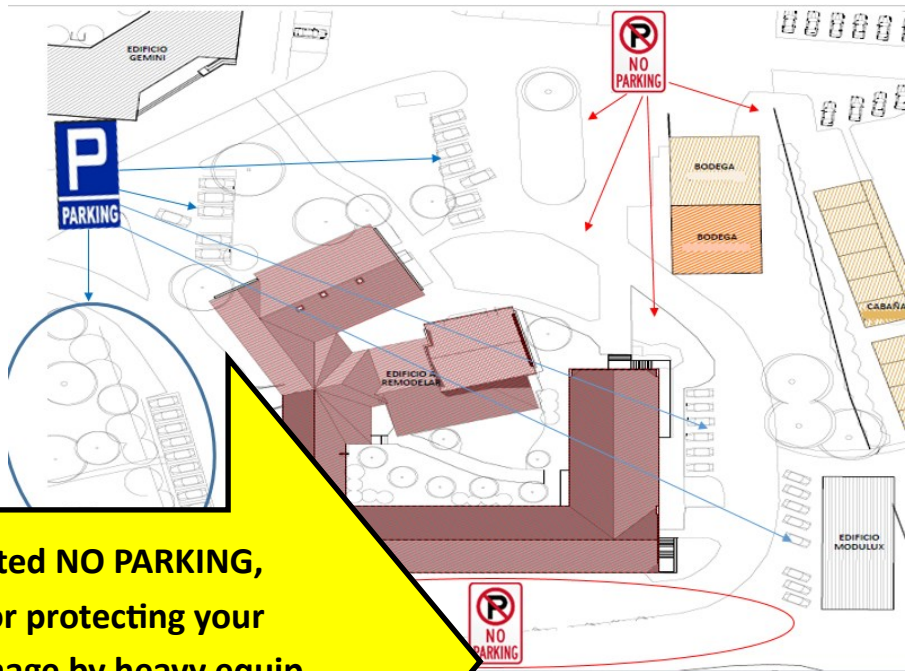

Follow the speed limits and indications of the signals disposed within the Recinto Aura.

In areas of heavy equipment traffic always drive on the right to avoid collisions, Remember heavy equipment required a wide angle to turn .

Avoid parking in areas designated NO PARKING, these have been established for protecting your vehicle so they will be not damage by heavy equipment.
